

NOW from Bull Moose Tube!

UV-Coated Black Pipe

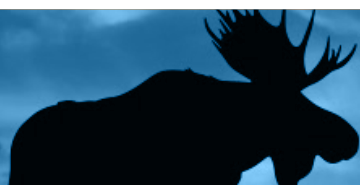

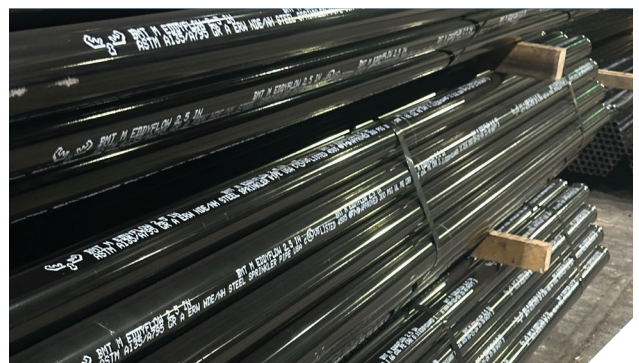

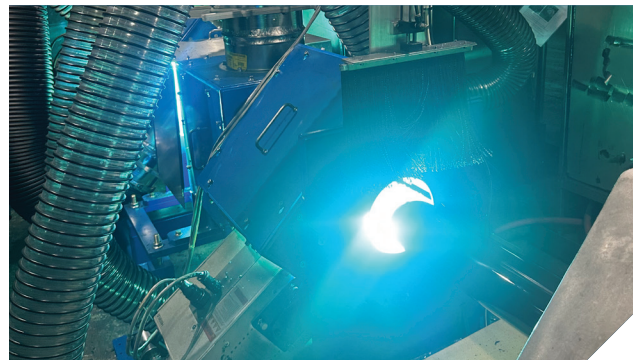

Durable and Corrosion-Resistant

The UV coating now available on Bull Moose black pipe brings a new look—and more importantly, new performance—to our renowned sprinkler pipe.

KEY BENEFITS:

- Superior corrosion resistance.
- Superior cosmetic appearance – high gloss look.
- High-value, with longer service life in harsh environments
- Reduced maintenance costs.
- The adhesion and flexibility of UV coating is proven even for roll grooving in sprinkler pipes.
- A sustainable process (cleaner than water-based coating, 100% Solid – No VOC's, no HAP's, no vaporation, less waste.)

Bull Moose is an early adopter of this technology in our U.S. manufacturing operations.
